

Curated and High-Performing Software Teams for Scaleups

Why Hiring Software Developers is Hard

What We're Doing About It

- ✗ Finding local developers takes too long and slows down your business' growth.
- ✗ Local Developers are expensive in an extremely competitive hiring environment.
- ✗ The rise of remote work creates challenges in managing teams (Admin & HR, culture, IP security).

- ✓ Finding dedicated developers of all levels and tech stacks within 2-8 weeks, not 6-12 months.
- ✓ Saving you up to 40% on developer wages & overheads by working with our high-quality Eastern European talent.
- ✓ Offering you a culture-first partnership that manages all HR and admin relations and extensive security processes.

You manage the product roadmap and development process. **We manage everything else.**

Recruiting

We scout, assess and hire the right candidate for you from a global candidate pool.

Account Manager

Regular check-ins with a dedicated account manager. We believe in trust & transparency.

HR & Legal

We set up contracts, and take care of tax, healthcare*, pension & benefits*. You are the owner of the IP created.

Costs

We believe in transparency and this is reflected in how we price. What do you pay?

Equipment

All team members receive high quality hardware* to fulfil their duties.

- Developer's salary p/m +
- One off recruitment fee (\$ depends on role)
- \$650 p/m management fee +
- *Additional extras charged p/m

Tech Talent on Demand

FRONT & BACK END | FULL STACK | MOBILE | BLOCKCHAIN
QA | PRODUCT MANAGEMENT | CUSTOMER SUPPORT

" Finding Ivy Tech has been such a boon! Integrating their developers in to our organization was seamless; their experience and knowledge made them active contributor to our codebase from day one. Now I just think of them as part of the team. "

Zac Kilgore,
CTO & Co-founder at Flexa, NYC
